### Bottle Makers' Profits in 1925 Far Exceed Those of Wet Days

(Special Correspondence)

NINCE the Volstead Law closed distilleries and breweries, the Owens Bottle Company, said to be one of the largest in the United States, has devoted itself to the manufacture of glass containers for foodstuffs and during the first six months of 1925 reports a net profit of \$2,713,271.44, a new high record for any similar period in the history of the company.

During the past few months, it is reported by company officials that the sale of bottles for ginger ale and other so called "soft The profits from new business have drinks, has been phenomenal. been exceptionally large and profits on all business are more than was paid last year in common and preferred dividends.

The company operates 13 plants including three of the American Bettle Company and two of the Charles Boldt Glass Company, subsidiaries. Before the prohibition amendment was adopted the Owens company did a large business in the manufacture of beer and whisky bottles as well as other glassware used in connection with the liquor business.

> Practically the same view is expressed in today's newspapers, which declare that a pact reserving to France the right to march into Gerthe League of Nations or any unilateral pact would be inacceptable.

### French Reply Awaited

PARIS, Aug. 17 (AP)-France's reply to Germany in regard to the proposed security pact probably will not be sent to Berlin until the end of the week. It is now said that it will be ready for dispatch Friday or Saturday, as it is still awaiting the approval of Belgium and Italy.

KING FEISUL IN PARIS PARIS, Aug. 17 (AP)-King Feisul of Irak arrived in Paris today on his way to London. He will continue his journey to England.

### CANADA DECLARED CONTENT TO KEEP DOMINION STATUS

(Continued from Page 1)

gagements which may involve the dominions in war ought not to be undertaken without their full concurrence. On the other hand the Dominions must not forget that the status of nationhood involves responsibilities as well as privileges.

Sir Robert's reply to Professor Smiddy, while apparently presenting the official British viewpoint, was moderate in tone. Coming from a man of such authority, his recomendations for changes in relationships were received with marked

Sir Robert began by tracing recent developments of dominion relations within the Commonwealth. "By what he asked, "can the doctrine of equal nationhood, complete autonomy, and adequate voice in foreign relations, be carried into effective 'out and out equal partnership.'

To obtain more effective consultation between dominions and home Government he proposed that Dominion high commissioners in London should be members of the Dominion cabinets, at home. "It would ! be natural as well as practical that he should become an imperial privy councilor entitled to attend a British Cabinet meeting when summoned. In a certain measure he would have the function of ambassador but the relations would be more intimate."

diplomatist. "Any such change." he aid, "would produce misunderstanding and might cause quite unfounded uspicion of Downing Street interference, which is still an alarm in Mr. Zumoto Comments on certain quarters." He thereupon proposal of annual meetings of Dominion statesmen in London a week prior to the meeting of the League Assembly. He concluded,

Extension in Vermont, saved hundreds of thousands of dollars to the farmers of New England, and pre-vented the undertaking of a coperative venture which was unsound in its initial plans. It should be noted, however, that the plans for the New England Dairy System have been revised, and in its ultimate form the organization has a chance to prove of substantial benefit to its

"Educational assistance to country home-owners to make their homes as attractive and enjoyable as those in the city is much in demand. Rural homes are not so easily provided with even the ordinary comforts which city populations enjoy. The call for educational service in clothing and textiles has grown beyond our capacity to meet it."

### TEXTILE TARIFF IS LABOR ISSUE

Mr. Green Says He Will Seek Reduction Because of Wage Cuts

Special from Monitor Bureau

WASHINGTON, Aug. 17 - The wage-cutting program instituted by textile manufacturers will be countered by a crive to reduce the protective tariff on textiles, was announced today by the American Federation of Labor in a letter from its president. William Green, to M. G. Pierce, president of the American Woolen Company.

Mr. Green declared that the textile manufacturers should be "deprived of special privileges and special benefits which they have enjoyed from high tariff protection," contending that when the tariff wall, erected with the ostensible purpose of protecting American labor, failed of this purpose as in the case of the textile industry, where wage cuts of 10 per it should be broken down. The August Sale

Comprising \$200,000 of Oriental Rugs at Reductions of a Fourth and More

Our entire stock of Oriental Rugs is included in the sweeping reductions of this sale! Something that has never happened before, and that we are doing because the tremendous response to the August Furniture Sale has shown us what a great demand for home things there is at

### Lowered Prices During August Only

It is generally known that the Wanamaker collection of Oriental Rugs is one of the few great stocks in America. Last year we sent three of our experts into the markets of the East. Only last week our New York chief returned from his foreign buying trip of this year.

We buy always in the lowest market. We sell as we buy-at lowest prices. Now, in this August Sale these prices are lowered still more.

The sale ranges from small Chinese Rugs of the \$20 grade at \$12.50 to a magnificent Sarouk, measuring 18 feet 5 inches by 12 feet 3 inches at \$2025, regularly \$3200. With an unimaginably fine assortment of sizes, qualities and kinds in between these two extremes.

## WAGES DOUBLE IN 13 YEARS. SURVEY SHOWS

Worker Who Earned \$791 in 1909 Got \$1537 in 1921, Experts Find

NEW YORK, Aug. 17 (A)-The total "current income" of the American people rose from \$67,254,000,000 in 1919 to \$74,158,000,000 in 1920 and declined to \$62,736,000,000 in 1921.

These figures are contained in a report to be issued by the National Bureau of Economic Research, which summarizes the results of an exhaus tive investigation upon which Dr. Willford I. King, Maurice Leven and a corps of assistants under the general direction of Dr. Edwin F. Gay and Dr. Wesley C. Mitchell, co-directors of research of the bureau, have 000,000 income of the peak year of en engaged since the summer of 1920.

the report is that 34,000,000 persons the United States it is revealed that engaged in "gainful occupations" do during the 13 years under review the

come of the gainfully occupied stead-ily increased to \$1851 in 1920. That Pattee, of Boston, the chairman. "It port brake shoes, in series 32 feet in \$1537, equal in value to 887 of the good coming from the discussions."
1913 dollars.

O. B. Jeaness of the University of

Prices Make Success

"Co-operative marketing necessarily has a very close relationship man in a tower does the work for-with problems of price." Mr. Jeaness or set of coupled cars "Farmers establish marketing associations because they see in them possibilities for getting better prices for their products. We may by this invention it was explained, talk about the spirit of co-operation are: and the desire to co-operate being motivating in co-operative marketing. These are essentials. But when all is said and done we go back to the fact that a co-operative marketing association is a business undertaking which justifies its existence by returns it is able to make to its members and patrons. Price is the vardstick employed in measuring its value. Unless this measure shows the organization to be worthwhile its days are numbered."

He said that better prices may be obtained by the employment of better and more economical methods of marketing; by bringing about more effective distribution; by more careful handling, grading, standardiza tion and other quality-improving ef-forts; by demand stimulation forts; through advertising and by dealer service and by bargaining to obtain the full market value.

### MILLIONS OF POUNDS TO IMPROVE SYDNEY

SYDNEY, N. S. W., July 10 (Special Correspondence)—During the next five years about £15,000.000 may be spent in the improvement of The bridge across the nar-Sydney. bor, connecting the city proper with penditure of about £5,000,000 beyond the amounts spent on preliminaries

The-city railway will require possibly £3,000,000 and if the Eastern Suburbs Railway, which also will be partly underground, is pushed on as desired, that will need another £3.000.000 or more. Then there are the incidental works to be carried out by the City Council and other municipalities to connect these new lines and the bridge, and to create new thoroughfares. These are all extras; that is, expenditure beyond the ordinary; consequently there is anticipation of much trade activity in Sydney during the period men

An operator in a tower manipover the retarder, and then guides it to the proper track in the yard by use of electric lever switches. Thus a man in a tower does the work foror set of coupled cars.

Advantages Listed Some services rendered at Gibson

Use of car riders and switchmer is eliminated, thus doing away with what the inventor terms the most hazardous work on a railroad. By eliminating need of car riders and switchmen, 15 men replace 75 men here. This means a gross saving of more than \$400 daily Control of cars on grades in the "hump" by this invention has pre-vented rough handling and reduced reight claims. Because cars can be spaced more

closely in routing by the new method less terminal area is required. Car repair force has been reduced from 36 to 9 men. Necessity of brake tests on cars, reliminary to routing, is obviated y use of braking medium on track.

Speed in routing cars is increased approximately 25 per cent Car stops to check progress of misdirected or speeding cars, are operated with this invention by electric control from towers. Thus this task, hazardous when formerly done by hand, is made safe.

Three shifts of five tower men of the show should be cut out enare doing the work formerly ac-

complished, at hazard, by 75 men in riding and switching cars at the Gibson "hump," 23 miles south of Chicago, where western and midwestern freight of three railroads

# Prohibition Found Better Than License Regulation

Oregon Attorney Joins Minnesota Educator and New York Banker in Praise of Dry Law

The Christian Science Monitor today prints another group of letters from the Manufacturers Record of July 30. This publication three years ago polled the Nation's business and professional leaders to see where they stood on the prohibition law. The survey showed that these men were significantly in favor of it. Revently the Manufacturers Record was challenged to make another survey asked to get the views of these same leaders after a three-year lapse. The data show that these men have reaffirmed their faith in prohibition and in addition demand more rigid law enforcement. From time to time the Monitor will print groups of these

William S. U'Ren, attorney, Portland, Ore.:

I am more convinced than ever that prohibition of the liquor traffic is altogether practicable as well as morally right and economically profitable for the whole people.

In Oregon the prohibition laws are more popular and more effectively enforced than the license liquor regulation laws ever were. Basing my opinion on the news in our daily papers and what I see and hear in our courts and on the streets. I verily believe the percentstreets, I verily believe the percentage of moonshiners and bootleggers convicted and punished is greater than in any other class of criminals. The going price of moonshine is about \$8 per quart, and comparatively few Oregonians who earn less than \$3900 a year are drinking or buying moonshine.

J. B. Johnston, dean of the College of Science. Literature and the Arts. University of Minnesota, Minneapolis. Minn .:

believe that it is chiefly those who wish to break the law, and do break it, who are advancing the argument that the prohibition law is a casual factor in the present attitude of

I think we must expect this lawbreaking for several years by the present generation of drinkers. After 15 or 20 years the whole country will be as fully committed to pro-hibition in theory and practice as was the State of Kansas at its best

selected him two years ago.

SOFIA, July 18 (Special Corre- the greater Allies, and even to the spondence)—As a traveler who knew lesser European states, and he looked with great disfavor upon any agita-tion for a change in the status of Bulgaria before her independence from Turkey, declared in 1908, during the interval between that time and the outbreak of the World War. and soon after the signature of the Treaty of Neuilly, of 1919, I consider that the situation which I found existing during my visit in June last is extreme and much less honest than he was himself. In the end this polmore critical than that which I have icy, which was originally intended to ever known in the past combat rather than to favor Bolshe-

The people are greatly impover-ished, Sofia and other parts of the country are in very bad condition, and the political atmosphere is more electric and more critical than in the times of King Ferdinand or of Mr. Stambulisky, whose regime followed the war. So far as economic con-ditions are concerned, these depend largely upon the weight of taxation, upon the burden of the reparations and upon the heavy expenditure necessary for the maintenance of a voluntary army, and therefore upon the fact that no money is available for the payment of adequate salaries. for repairs and for renewals which

are long overdue. With regard to politics, an acute division exists in home and foreign opinion as to the causes of the present crisis. On the one hand there are those who say that the whole counis threatened with Bolshevism, instigated by Russia and by its exponents or supporters in Vienna and elsewhere, and who contend that no measures taken by the Bulgarian Government, which has been in power since June. 1923, can be too severe or too, military to meet the occasion. And on the other side there are politicians and students who suggest that the principal object of the present Premier, Alexander Zankoff, and of his colleagues to utilize the general danger of Bolshevism in order to justify a re-pressive attitude toward their potical opponents and thus to maintain themselves in power.

Arguments Exaggerated

Each of these arguments contains administration has lost and loses no the mark. My purpose in this article the mark. My purpose in this article the existing conditions, and especially the mark the limitations placed upon the army, to be modified, then the dangers would be modified. specially to the notice of the general public by the bomb outrage in the Cathedral at Sofia on April 16, but which is as critical today as at any time since the beginning of Bul-garia's period of adversity, which dates from the Second Balkan War

In order to understand the present position and the possibilities of the future it is necessary to refer to re-cent history. From 1878 until 1913 Bulgaria and her people became gradually more prosperous and more important, but in the latter year they suffered a great setback as a result of defeat in the Second Balkan War. Largely in order to try to retrieve her then losses. Bulgaria threw in her lot with the Central Powers, with the consequences that the Allied vicory led to the enforced abdication of King Ferdinand and to peace terms which placed the country in a much worse position than before. All immediate hope of securing possession mediate hope of securing possession than before the categories of the commit a murder funeral service in that building, because some of the criminals are known to new post when he was viting Canada King Ferdinand and to peace terms of Macedonia disappeared, the strip of territory bordering upon the Ægean was lost, and Bulgaria beame the smallest and least import-

ant Balkan state execpt Albania. Moreover, whereas a commercial outlet to the Ægean was promised under the Treaty of Neuilly, and whereas the Bulgarian minorities in Greece and in Jugoslavia' were to reeive fair treatment, practically nothing has yet been done to realize ditions. And, lastly, a reduced and impoverished country has been overrun by thousands, indeed hundreds of thousands, of Balkan who have fled for safety from the neighboring states, and by large numbers of Russians, many of whom were accepted at the persuasion of the Allies and after the defeat of General Wrangel. These refugees are all discontented and a cause of discontert among the native population, and the Russians, who pro-Russian, even if they are not Bolshevized, constitute a great danger to the stability of Bulgaria, who has tried, without success, to

Bulgaria as a country in which peasant proprietorship is almost universal, can hardly be Bolshevist in the ordinary sense of the word. But Bolshevism is a germ, which takes different forms and adapts itself to different conditions and, for reasons already given, the Bulgarian patient has been and is extremely susceptible to its ravages. Consequently, in order to meet a danger, which has existed since the Armistice, M. Stambulisky, the peasant Premier, pursued a policy so agrarian, so democratic and so almost socialistic, that it met with the approval of many of the rural and more advanced ele-ments in the country.

Peace at Any Cost From the external standpoint the former Prime Minister favored peace at all costs; he was subservient to the immediate crisis appears to be over, there are measures necessary to meet a situation which depends partly upon the encouragement given to Socialism by the policy of Mr. Stambulisky, partly upon the repressive attitude of the present Government, and partly upon Bolshevist, propaganda.

Mr. Zankoff and his colleagues, all of whom have had great provocation, are not blameworthy for an early severity and for the arrest of any-body even suspected of complicity in

of ridding themselves of an opposition which may soon become trouble

· Revolutionary Government The present Government came into vism, in fact encouraged those who power as a result of a revolution were in sympathy with revolution. created a state of great ill-feeling and therefore by unconstitutional among the supporters of the older means. The elections of November political parties, and favored the 1923, convey no real idea of its work of the military or former milstrength or weakness in the country itary section of the community which and, unless something is done in the was responsible for the coup d'état near future to change the existing of June, 1923, and for the subsequent situation, it will be compelled to vasituation, it will be compelled to vacate office by methods perhaps m violent than those by which it as-From that time onward, the menace of Bolshevism has been countered sumed power.

Two courses are open. The King. whose position is very delicate and very difficult, might summon some trary methods, and by a system diother statesman, who would then rected from the extreme right: Mr. seek, and surely obtain a mandate from the people. Or Mr. Zankoff take the initiative and tion or fusion of parties, but he owes strengthen his present Cabinet, which represents a sort of fusion of his advent, and still more his retention of power, to the military parties, by a representative coalition. The adoption of the second alternacially to the Officers' League which tive would gain for the Premier the support of the Moderate Agrarians. who are still strong, of the Demo-crats led by M. Malinoff, who is the most experienced man in the country, and of other parties, and Mr. Zankoff would thus gain stability but no serious attempt has been which is urgently required in existing circumstances. tion and particularly of the peasant

In conclusion, it only remains to say that the present danger in Bulgaria arises from discontent rather than from a widespread belief in the tenets of Bolshevism. That danger can be minimized by a sympathetic attitude displayed by the great powers toward several of the questions which I have mentioned and by the termination of the violent partisanship which has divided the country into two camps for the last six years Unity, even temporary unity, would mean safety. Acute political division must lead to destruction from within

### COTTON 'SUPER' HAS'GOOD AUDIO TRANSFORMERS

Two Stages, Using New Type Samson, Proves to Have Excellent Tone

By VOLNEY HURD (This is the third of a scries of rticles on a popular superhetero-

This coming fall will see a great amount of attention paid to the improving of audio amplification. This end of radio has in the past been pretty much neglected in the great desire to perfect the sensitivity and selectivity of receivers. At the end of the radio season this last spring

to make itself heard with some force.

The re-presentation of the resistance type of amplifier during the and its popular reception showed which way the wind was the transformer type of amplification in general use at that time was the noor step-up given to the low notes as compared with those in the middle and upper register.

During the spring a number of transformer manufacturers started working on this problem, and it was found that the primary change needed in existing types of transgood transformers have made their

radio and electrical industries. The Samson company also turned their research in this direction. Fortheir three-to-one ratio ransformer was already endowed with one of the necessary characteristics since its primary consisted of 6000 turns. A larger fron core was added and the result was a transformer that amplifies the low tones practically equally over the entire band of audible frequencies.

In reading the curves the point to be remembered is that the amplification must be considered from a The curves should approach as near a straight line as possible if all the notes on the scale are to be given an equal amount of amplification. The further they get from an equal point

Now let us examine the curves on accompanying diagram. The curves two and five are high-priced high ratio transformers. They are quite good but the curve is far from flat and the falling off of the bass is quite sharp. Figure three is a medium ratio transformer which shows many of the characteristics of the four has the poorest curve of all It is wery weak at the base and the its rise is gradual, yet so steep that the amplification is bound to be meven. This is certainly a producer of distortion and yet was adver-tised during the past year as ampli-

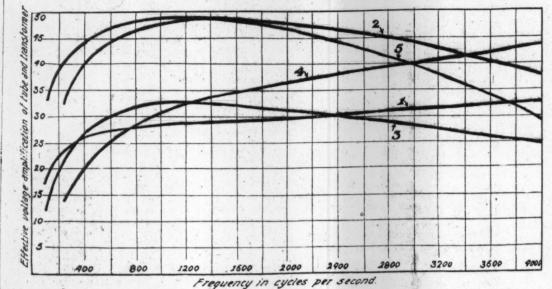

5:30 p. m.—WNAC dinner dance, Shep-ard Colonial dance orchestra, direction Billy Lossez, 6:35—Concert, Copley-Plaza orchestra, 7—Varied program, ar-ranged by Boston Lodge No. 10, B. P. O. E. Curve one shows the three to one Samson transformer discussed in the earlier part of this article. It is by far the flattest of any of the curves taken, which means that it will am-plify the low, medium and high tones with their accompanying harmonics with great fidelity.

There are many who like resistance coupling as well as transthe two may be arrived at by putting resistance across the secondary of an audio transformer. In this receiver we have incorporated this idea as may be seen from the diagram which accompanied the first article. The first stage has a .25 megohm leak and the second a .1 megohm leak fastened across their respective transformer secondaries. Two of the new three to one transformers are used. This gives a very fine audio amplifier to add to the rest of this uperheterodyne. The next and last article will take up assembling and

### demand for quality had started PACIFIC RADIO EXPOSITION STARTS AMERICAN SEASON

blowing. The principal weakness in San Francisco, With the First of the "Big Shows," Is Enthusiastic Over the Progress Made by Radio Manufacturers and Dealers

torium occupied by the 206 exhibi-tors representing every section of in the auditorium. It is erected on a amount of iron used in the core and is large primary winding in the united States and every type of large primary winding in the radio, the second annual Pacific large elevated stage in the center of the auditorium. It is sound proof, with a 30-foot plate along the past few months. During the past few months several 22 to 28 promises to continue the order that spectators may see the rood transformers have made their successes of last year in knitting to-artists and operators at work in suppearance, one selling at \$9, one at gether the components of a new in-\$7, and one at \$6, all of them made dustry for mutual service to the enreputable manufacturers in the gineer, the manufacturer, the distributor and the public.

The Pacific show, first of the season, uses 15 per cent more exhibit space than the International Radio Exposition held in New York last year, according to Fred J. Cram, in charge of eastern manufacturers' exhibits. This fact is cited as an indication that radio is commanding a larger place in the industrial world as meteoric developments and uses have multiplied during the year. The Pacific Radio Show is now linked up with similar affairs following in New York and Chicago. The three expositions have been formally indorsed by the National Radio Manufacturers' Association.

There is apparent even greater chandise. The intricacies of a radio- 1000 persons.

Secretary of State, Parliamentary Under Secretary, and permanent head, was created to deal with dominions, as distinct from colonial affairs, it is probable that representations made by a majority of the states would result in the British Government acquiescing in the appointment of local governors. Mr. Gillies, Premier of Queensland, intends to bring the matter before his fellow premiers at the earliest opportunity, so it seems quite likely that the future governors of the states, at any rate, will be selected from the ranks of Australians.

denser.

The set should work practically as well with the coils six inches apart, the only difficulty would be in balancing. You might try mounting your condensers and coils at either end of your 21-inch panel (4 inches from the ends) and place your tubes and audio transformer between the two. Your tubes should be in line with the coils while your audio transformers should be mounted close to the front panel so that they fall in line with the condensers.

about in connection with some difficulty I am experiencing.
The set is made up with National kit of condensers and coils, and I am experiencing trouble on account of broad tuning, especially on the higher wavelengths. The reason for this may be that it is on a 21-inch panel and the condensers are only six inches apart, instead of eight inches as recommended.

I have an idea that perhaps by taking off a certain number of turns from one of the coils this may be remedied. I have an idea that perhaps by taking off a certain number of turns from one of the coils this may be remedied if so, I thought you could probably advise me where they should be taken from and how many turns should come the Ministry.

tution of the practice of selecting local men, with a knowledge of local of conditions. On several occasions the British Colonial Office has been approached with a view to effecting the change, and the last time this was done the then Secretary of State for the Colonies promised that the reform would be granted as soon as there was unanimity or something approaching it among the states.

With the increasing respect paid to Dominion opinion in England, as exemplified in the recent change in the Colonial Office, where an entirely new deqartment, with a separate Secretary of State, Parliamentary Under Secretary, and permanent (Ans.) We would not advise removed the Ministry.

I had similar difficulty with an Amburdant of turns from the primary of the tuning coit the sassador circuit I built, and found that by removing a certain number of turns from the primary of the tuning coit is was remedied. The Browning-Drake I now have is good distance, tone quality fine and am well pleased with it with the above exception. In passing would say several of my friends desire to build this circuit and especially on a 21-inch panel. This does not justify the space. This does not justify the space. # The Significance of Spanish Art same struggle, the same purity of same struggle, the same purity of devotion

Special Correspondence RECENT years there have been two exhibitions of firstart of Spain. One was held at Burlington House in London in 1921 and the other this year in Paris at the Hotel Charpentier.

Both exhibitions have a peculiar history worth mentioning. The London exhibition was for propaganda; it was conceived during the war in the hope of promoting friendship be-tween Spain and Great Britain. It so happened that the exhibition could not be got ready during the war, but it was held nevertheless, to the great delight of Londoners.

The Paris exhibition was organized by an association called the "Demeure Historique"-a society whose ostensible object it is to preserve national art treasures for the nation that created them. The Paris exhi-bition, however, will no doubt encourage many Frenchmen of suffi-cient taste and wealth-to do their tmost to strip Spain of as many works of art as possible.

A Complex Art

Movements in the world of art-movements which tend to the appreciation of a particular style—are not, however, determined by politi-

The art of Spain is complex be-cause it is born of a multitude of allen forces, and it is potent because it has somehow been able to swal-It must not be supposed, however, that Spain always possessed a kind as rapidly as it appeared on the scene, only to issue forth immedi-ately in a new and perfectly Spanish guise. The process was quite different; at the beginning of its artistic history, strange as it may sound, there was no Spanish art, and it was centuries before the artistic manifestations which took place in

Early Art Roman

The early art of Spain is Roman, and fine examples are being discovered even at the present day, for excavations are in progress on the very extensive remains of what must have been very nearly a Roman town of which history has neglected

The Roman era was followed by the northern invasion of Goths and Visigoths. Historians consider, per-Visigoths. Historians consider, perhaps a little unreasonably, that their influence was an obstacle to Spanish art. all artistic obstacles being really nothing but a source of new resionism.

ally certain effects of light and color, relations of planes, movement. This attractive appearance. There are carried him eventually into all the extremes of cubism and post-impressionism.

Compris, a good still life, "Peonies"; attractive appearance. There are carried him eventually into all the extremes of cubism and post-impressionism. strength if they are overcome, as is obviously the case in Spain.

Historically there follows the indid battle with the simple cubic coneptions of the early Roman style. Nor was this battle fought by the erection of buildings wholly Moorish the face of architecture purely Roman or Gothic in tendency. What happened was that the northern princes of Castile, Navarre and Arabuilt churches designed in Gothic or Roman styles, and executed by builders and workmen who were partly indigenous and partly Moorish, so that both influences became part of the tradition of the

invaded and the invaders. North and South

The northern and eastern portions of the peninsula, Aragon, Catalonia and Valcencia, districts linked by the Mediterranean to Italy, naturally re-Moorish influence successfully, and devoted their efforts to the perfection of a Spanish Gothic style from the tenth to the fifteenth century. The south, on the contrary, rejected the Gothic attitude to art, and has given us instead the Mosque at Cordova, the Alcazar at Seville, and the Alhambra at Grenada.

In painting in the Middle Ages etti.

Spain became also the center of the cross current of two strong external influences; one came across the sea that one observes the new current the tall stalks of delphinium to form salem," with its gemlike bits of from Italy, the other came from the about which Signor Ojetti speaks. north through artists from France, Holland and Germany.

The upshot of this great variety of artistic forces was primarily twofold. Consciously or unconsciously, every artist who encountered the opposition of alien influences in his fingers felt the need of asserting whatever his own style was with a good deal of vigor; and secondly, the evolution of a national style required an un-usually long period in view of the many cross currents that had to be had become assimilated.

Wealth of Variety

and sculpture, not so much in terms of quantity but of variety. Hence the luxurious and wild extravagance of the ample curves of a painter like Herrera the Elder, the extreme intensity, almost ecstatic qualities of a Zurbaran. A love of gorgeousness is perhaps a Spanish peculiarity which found full satisfaction in the aristocratic art of a Velasquez, who seemed to suffer from no trace of technical difficulty. His, brush-work so flawless, his figures so living and yet chiseled and firm as stone. his velvet so velvety that the very perfection and its apparent ease almost chill us.

Going to the other extreme, we find Theotocopuli, more Spanish than

and changes. With pride in the accomplishments of his country, he ous attack. He gets down to the results, for their start has been gen. The Cologne fair building says, "Italian art has been a contin-uous line that has not been broken. fundamentals of movement, or those uine and wholesome Spain were welded into a form Its tradition of nearly 3000 years is which corresponds to our concept the longest and richest of any European country. There is no country in which there is an active living evement with as old a tradition.

Reversal of Attitude "The present state of art is in

teresting, for it shows an entire reversal of the attitude toward the function of art since the last cenduring the war. Previously the artist let himself be controlled by nature, painting slavishly and literally certain effects of light and court well hung and said well composed "Gray Dec". The white clouds floating lazily in a lambent sky: C. G. Farrington, a is very well hung and said well composed "Gray Dec". ally certain effects of light and color, pressionism.

'But there has been a revolution in the attitude of artists. Instead of letting themselves be dominated by vasion of the Arabs, who caused a real artistic revolution. Moorish outside themselves, they have come curves struggled with the Roman to a realization of what they have perpendiculars, architectural filigree assailed the substance of Roman massiveness; spherical shapes elongated and twisted into Arab patterns gated and twisted into Arab patterns put the words together and infuse composed winter scene of put the words together and infuse composed winter scene of put the words together and infuse composed winter scene of constant the large and infuse composed winter scene of constant the large and infuse composed winter scene of put the words together and infuse composed winter scene of constant the large and color and suave painting; as well composed winter scene of constant the large and color and suave painting; as well composed winter scene of constant the large and color and suave painting; as well composed winter scene of constant the large and color and suave painting; as well composed winter scene of constant the large and color and suave painting; as well composed within them. Today our artists have come to draw upon nature as a dictionary of words. They themselves a well composed winter scene of put the words together and infuse. put the words together and infuse planes of the landscape are sensitively felt as the eye follows the the Harbor' what they want and control it with their own personalities. They have come to realize that a picture is not merely an accumulation of certain forms: it is a combination of that vocabulary drawn from nature plus the personality of the artist."

Indeed, what Signor Ojetti has to say of Italian art is as true of the movement throughout Europe. One goes to the Biennalle Exposition in Rome and finds that the display of cubism, good and interesting enough, shows tendencies toward over-ripeness. The artists are ready for something else. They have exhausted their ingenuity and perhaps become a little bored with those geometrical chromo-schemes. Perhaps they feel that it is merely a means to paint in that way, an instrument, rather than an end in itself. These gymnastics of contortion will be bound to have some sort of invigorating effect. One cannot help thinking that there must be some sort of eventual effectiveness in the futuristic efforts of Depero, Prampolini and Marin-

# The Lyme Art Show

Lyme, Conn., Aug. 10 Special Correspondence PREDOMINANCE of cattle, laurel and mist characterizes wood as seen through a fog.

the twenty-fourth annual exhibition of the Lyme Art Association ment is made by Edward Volkert, a which opened in the society's gallery on Aug. 1 and will close on Sept. 7, making the longest display in the tention as does Mr. Wiggins' "Monassociation's history. association's history. The feature of the exhibit is un-

canvas called "Indian Summer." a landscape not dissimilar in sub-ject to the landscapes which pre-dominate in all Lyme shows and racy the brilliant glare of the light dominate in all Lyme shows and racy the brilliant glare of the light notable only for an excellence of reflected from the snow. It is a fine workmanship above the average of the Lyme colony. But Mr. Wiggins' contributions to the current show are very different.

In the collection Volkert further shows his unusual talent in handling

He has entered four canvases. One, a product of his recent trip into the west, is called "Montana Mountains." The other three are French subjects, "In Provence," "On the French Riviera," and "St. Paul du Var." The French canvases only canvas, a pasture scene called with several landscapes, of which "The Marsh From Saunders" is particularly fine. William H. Howe and Clark G. Vorhees also deserve special commendation. Mr. Howe's only canvas, a pasture scene called have a geometrical quality that indicates that Mr. Wiggins has been cates that Mr. Wiggins has been drinking deep at the well of the modernists. The color schemes are modernists. The color schemes are and of a decorative and of a decorative fully paints a wood road bordered fully paints a wood road bordered. for the artist's former landscapes. there is nothing to suggest that these are relatives except the quality of the workmanship. In both manners Mr. Wiggins seems to know what he wants, and accomplishes his desires with dispatch.

"Montana Mountains"

The most striking of his four paintings is "Montana Mountains." This holds a conspicuous place and is RAVELERS coming to Germany in the course of this summer sculpture in stone and wood. Two will have a unique expectation of the course of this summer sculpture in stone and wood. Two unfavorable. This canvas represents foreground. The peak is painted in lilac-grey, pink-white and white, and the mountain and trees of the mid-

self as one of the greatest of German
painters.

preoccupation with half-seen landscapes veiled in mist is also notice-

able. Bruce Crane in "The Late Year" contributes one of the best, a representation of a wood lot and its mud road flanked with heaps of cord-

# Windows

S you pass along the business streets, you look into the windows of the shops, where well-displayed goods invite your attention and interest.

As you read this copy of The Christian Science Monitor, each advertisement on which your eye rests is the shop window in this newspaper of some business establishment, which thus informs you of its goods or its services.

Looking into these shop windows of the Monitor, you will find that they present opportunities for the supplying of practically all your daily needs.

You will find it pleasant and profitable to deal with the merchants who advertise in the Monitor, and your patronage will help to convince them that money is well invested when devoted to advertising in the Monitor.

# History by Time-Chart and With Wider Horizons

Special Correspondence ORTY years ago two Cambridge undergraduates were spending their vacation in Belgium. It was the first time they had been abroad, and everything was new and Most of all they were attracted by the old Flemish towns, their picturesque streets, their galleries and their public buildings. In the spacious council chamber of one

But what have the Spanish kings to do with Flanders?" naïvely asked one of them. The guide looked astonished as well he might, but politely gave them a few elementary lessons in European history. The ignorance was certainly lamentable, but it was thoroughly characteristic of the average Englishman of the day, of his complete indifference to the his- any rate, took this lesson to heart.

were isolated completely from the rest of the world-story. Now much hung on this attitude. The historian stately Hotel de Ville they were shown portraits of old Spanish of the future may well regard it as a proof of that narrow insularity which not only prompted misunder--tanding but even contempt for the foreigner. It may have been not one of the least potent causes of war. It seems impossible to believe it now, yet such was the fact.

Started Broader History One of the undergraduates, at

# How a Mother Taught Son to Tell the Truth but still emphatically one. It is the

To the Editor of the Educational Page:

The Educational Page of June 22 was devoted to the subject of punishment. It brought to mind an experience I had with one of my children. In many homes he would have been punished for falsehood although he was not a falsifier. From his infancy I had never felt sure that his word was dependable and yet I had never heard him tell a distinct untruth. But there was always in his boylsh eye that which said "If I thought you did not know I should like to answer otherwise." condition bothered me greatly. But year after year went by until he became about eight years of age. Then I realized that something st be done about it.
So I studied him and the problem for weeks and began to see that

the word "truth" had no definite meaning for him. Then came his education in this respect. We began the study of accurate statement. One day he came in saying the older brother had hit him. I called the other boy. "Yes" he had hit him. "He got into a boat and you had forbidden it so I pulled him out. He hit me and I hit him back." This was the whole truth. He agreed to it. So we sat down with two separate slips of paper, one headed "This is a whole truth," the other "This is a half-truth." Under these headings he wrote the two conver-This was done when such occasions occurred and then we opened a

trust account. I was a banking firm and he the depositor. When he had been especially trustworthy he was given credit. When he wanted some particular freedom or privilege he was told to go to his bank book and ascertain whether he had an amount of trust from which to draw. Within a very short time his eyes and actions testified to the under

standing of dependability and trustworthiness. He is now 12 years old and absolutely honest. May I add that if this method is to be followed the teacher must be "on the job" constantly and ever alert.

I am desiring that some day I, or some other person may have the privilege of introducing a course of this sort into some school that all little folks may in time share with my little son the joys attendant

upon an understanding of true statement.

His chief in its curriculum for the study of which he was attached. His chief European or world history. Indeed, difficulty apart from the indifference, it may be said that no history at all sometimes the hostility of the auwas studied properly except that of thorities, was to find a suitable text-Greece and Rome. And this was a book. There were practically none thing apart; the two civilizations at the time except a few arid comevents. Since then there has been a complete and most necessary change

In the elementary schools, as well as the secondary, the pupils are brought up on a generous diet of history, and are being trained to realize the place of their own country not as an isolated unit but as a member of a great confraternity of nations. Very much remains to be done before the generality of the people are imbued with what I may call the historical sense, the conception of man's life on the globe as a sort of great river fed by innumer unity of civilization that needs stressing.

In Advancing Wisdom

The pupil should be able to place any important event in its proper perspective and amid its proper surroundings. Many people still find it difficult to realize that several mighty empires had risen and fallen before Julius Cæsar landed on these inhospitable shores or that Crete was the center of a rich and impor-tant civilization which perished before the Israelites entered the prom sed land. The first person probably who realized this deficiency in the modern mind was the late Dr. Jonathan Hutchinson, who in his interesting historical museum at Hasle mere used what he called the "space-for-time principle." All round a long room he divided the wall into a series of equal compartments each representing the space of a thousand own brief life and experience is of war across the planet. It is not to the wall or resting in cases un-"alchuringa," the word used by the that the wars are treated with underneath were all sorts of material helps—pictures, photographs and, better still, actual objects belonging to the particular millennium. By this method, as he said, the eye of the observer helps to train and inspections are often relegated to the nebulous "bygone days," that dim trailized and the imagination of the nebulous "bygone days," that dim reader sweetened a little by another said unfatherable shows in which are deed, if I may so put it to stretch the mind.

For as man advances in knowledge and wisdom he learns more and more to throw his glance further and further backward, and to date with the mind.

Now to sharpen the mind's vision

further backward, and to date with greater and greater accuracy the most important happenings in time. we need to push back the vague and There they would glitter like the most important happenings in time.

Yow to sharpen the mind's vision who are really more important fig-ures than the soldier and the sailor. To the savage everything outside his partments, to introduce measure and path across the seas of time. It is Civic Consciousness in the Kindergarten

happenings of its own time.

Hitherto this method has been mainly confined to a few museums.

ments which will be reported to the state president of the parent-teacher associations.

Courses in parent-teacher organization and leadership were given this spring at the University of Chattanooga and the University of Tenlessee, at Knoxville. Mrs. Arthur C. Watkins, executive secretary of the National Congress of Parents and Teachers, conducted the courses which were open to all desiring to attend without fee for any part of the work. The Chattanooga course lasted two days while the Knoxville program covered five days. Topics on which Mrs. Watkins addressed the sessions were: "National Plan of Organization," "Reasons for Local P. T. A.," "Programs," "Legitimate Fields for the Several Types of Asso-ciations or Committees and How They Function," and "State and National Co-operating Agencies." Emphasizing the last topic, Mrs. Watkins pointed out the ever increasing need of the parent-teacher workers joining forces with other child wel-fare organizations and committees. The expert speakers and the vast amount of educational literature coming to the parent-teacher asso-ciations through this co-operation revealed to many workers opportunities before unknown. The same series of lectures, with round tables following, was carried out at both places, the Chattanooga program being intensified to suit the time.

Parent-teacher training courses were scheduled to cover a large part of Oregon's territory this summer. The national field secretary, Miss Frances Hays, has been conducting institutes at centers which cover five distinct sections. The University of Oregon sponsors a course of one week at Portland, giving certificates to those who attend at least 12 hours during the week in addition to completing the minimum amount of reading required. The State Normal School supports the course at Monmouth where regular credits are given. The Oregon branch of the Congress of Parents and Teachers finances its intensive courses at other centers. Students and parent-teacher members join in the classes, which gives opportunity for mutual intelligence of the aims and purposes as well as of the mechanics of the

### Two Climates

In north central Minnesota a "height of land" separates the southern part of the State from a vast northern region which belongs, geographically, to the arctic. The rivers begin to flow north, and there is no

sota and rides through fields gay This alone would not be so re-

markable were it not for the that a month and a half later the changes are partially reversed. Leaving southern Minnesota late in July, when the goldenrod of that district has hardly dared herald the approach of autumn, he finds as he fares north that the plant life frankly announces that the northern season is shorter on both ends. Just as the marsh marigolds bloom later than they do below the divide, so typical fall blooms, goldenrod, wild asters and gentian, open sooner as summer advances.

The theory of the early days, that the dense pine forests "held in" the cold and accounted for the late springs and early falls of northern Minnesota, has had to go into the discard now that most of the forests have been cut, and there is approximately as much sunshine north of the divide as there is to the south. The State simply has two different climates, on the one hand that of lowa, and on the other the climate

of Ontario and Manitoba. It is a fortunate thing for southern Minnesota that during the weeks of early fall, especially September when the corn is ripening, the pre vailing winds are from southerly points. For several weeks then the ccumulated warmth of the mid-continert seems to flow north in

steady stream, as if defying the polar The Hull of Heaven blasts to start their winter pranks. (Translation of a Maori name in Then, slowly, the arctic frosts prevail, and presently comes the season when roses, marsh narigolds, asters ritten for The Christian Science Monitor and maize are memories, until a new Upon the Hill of Heaven, all the day spring solstice stirs the growth of a

## STOCK MARKET CONTINUES TO MOVE UPWARD

Railroad Shares Strong and Many Industrials at New Highs

NEW YORK, Aug. 17 (A)-Revival NEW YORK, Aug. 17 (P)—Revival of strength and activity in the railroad shares in apparent reflection of record-breaking freight traffic and high current earnings, featured the opening of today's stock market. Wabash common led the early advance, opening 13x points higher at 431x and was followed into new high ground by New Haven and Great Northern preferred. With the exception of Marland, most of the joils were heavy.

ineculative interest centered largely the high priced industrials in the ly trading. American Can, Dunt, General Electric and Internatial Telephone fell back 1½ to arry 3 points on profit-taking. This ling, however, failed to dampen lish enthusiasm in other quarters. Seneral Railway Signal soured arly 16 points, Westinghouse Afrake jumped 7 to a new record top 143 and Mack Trucks moved up 5 a new peak at 122%. Early gains Pipe, and Havana Electric p over 4 points to the nigness processince last March in reflection of examining mill operations and stiffening price tendencies for steel products.

High Priced Issues Up

xcept in the case of Dupont, which the morning. There was a steady in-crease in public participation which stimulated short covering in high priced issues, particularly those in which capital split-ups of larger distri-butions to stockholders are believed to

opending.

S. Kresge, the highest-priced issue of in, opened 45 points higher at word top of 540. With steady imment being reported in several lines of trade and prospects for tinuance of relatively easy mohey

ndry sold 3 to 5 points higher in

most part were toward higher levels.
American Can, after being down to
237 early, rebounded to 243 and fell off,
again to 240½. International Telephone & Telegraph Company broke
5%. General Baking, on the other
hand, rose 6 and there was a considerable show of strength in Allis
c'halmers, New York Air Brake, Atlantic Gulf & West Indies, Rock Island, Norfolk and Radio.

THE WILLIAM CARTER COMPANY A dividend of one and one-half per cent (\$1.50 g share) on the preferred stock of this company has been declared, payable Sept. 15, 1925, to stockholders of record at the close of business September 10, 1925. HORACE A. CARTER, Treasurer,

AMOSKEAG REVALUES ITS QUICK ASSETS

Show Increase of 66 2-3 Per Cent Since Last October

The outstanding fact made public by the new Amoskeag Manufacturing Company plans, an examination of the circular to shareholders shows, is the assets than the May 31, 1924, statement showed at the annual meeting last October. . The increase is just 66 2-3 per cent—from \$27,032,045 to \$45,158,707. The additional equity now disclosed for the first time is almost the entire equivalent of the total in-

the entire equivalent of the total invested funds segregated.

The computation of present quick assets is arrived at as follows: For the purposes of the merger with Parkhill, Amoskeag was revalued as of June 1, 1925, the start of the current fiscal year. On the basis that shareholders of both mills received new preferred stock for net quick assets. Amoskeag is to receive 264.-720 shares of preferred. That total implies net quick of \$26,472,000. Adding to this total investments of \$18.-

f normal.

Georgia peach crop, estimated to exeed 13,500 carloads, will net farmers
nore than \$8,000,000 this year.

Of the rising \$18,000,000 additional
equity about \$5,600,000 came from Times London cable says the delegation representing the Russian Soviet is in Manchester to purchase textile machinery and has £5,000,000 to spend.

Belfast (Me.) plant of Booth Fisheries

# SHOWING PROGRESS

Production May Double That

give the company as much more land as it desirés.

Since the \$75,000,000 Australian loan was floated in New York iast month, there has been discussion among investment bankers of the possibility of further Australian financing in this market. Conversations are now in progress concerning the financial needs of a number of Australian states and municipalities, though the stage of actual negotiations has not been reached.

Brunswick-Balke-Collender Company, General Electric Company, the Radio Corporation of America and Westing-house Electric Company have jointly perfected a new sound-reproducing instrument which is claimed to be greatly superior to the phonograph and radio in its music range and quality. The invention, which has been named the "phanastrope" to indicate that it reproduces all octaves, is a combination of radio and talking-film development with the phonograph.

LAKE SUPERIOR CORP.

NEW YORK, Aug. 17—Lake Superior

plants will be ready in season to handle the present growing crop. Utah-Idaho Sugar Company on June 30 last, had \$7,300,000 of net working capital. Current assets to-taled \$8,746,772 and current liabilities \$1.437,763. Cash amounted to \$556.-772. and merchandise inventories (sugar) was naturally the largest item

737.
The sugar on hand in carried at an average of \$5.60 a bag. The company WORCESTER, Aug. 17—As the result of business increase, the Norton Company has expanded operations until the company is now employing approximately 2500 workers and all departments are operating at nearly normal carecity. LOS ANGELES

# STEEL DEMAND CONTINUES AT MODERATE PACE

### **Expected Fall Improvement** Not Yet Evident-Prices Generally Easier

NEW YORK, Aug. 17 (Special)-Though the change in the steel situation over a week ago is practically nil from an actual basis the outstanding impression is colored with a shade less optimism. This is partly disap-pointment because the middle of Au-gust has been reached without any

cent price levels, particularly in the east. The railroads still hold aloof from purchasing and hence steel's best customer is failing to meet expectations. Even those commodities which supposedly advanced slightly in prices have exhibited weak spots.

Thus galvanized sheets which were supposedly boosted to 4.30c a pound. Pittsburgh, have sold freely at 4.20c, and black sheets, which were said to be 3.20c, have gone at 3.10c. The Chicago district is the only exception where galvanized sheets are solidly entrenched \$1 a ton higher at 4.35c. Chicago mill. Pig iron, which was thought to be 50c a ton higher in the east, has proven itself wobbly.

Among the more cheerful features is the good volume of business done by the jobbers who say that August business is decidedly better than that of July. Since jobbers reach such a wide variety of consumers that is cericilly an artificities ign.

wide variety of consumers that is cer-tainly an optimistic sign.
Again, production is surely increas-ing. The plants of the Steel Corpora-tion, for instance, are working at 71 per cent of capacity compared with 65 per cent a month ago.

Steel Bars Lower Most disturbing in the price situation has been a \$2 a ton yielding in steel bars, heretofore one of the strongest commodities. A farge independent maker, usually depended upon for maintaining the market, has cut \$2 a ton to 1.90c a pound. Pittsburgh. A new low price on steel plates has been made, or 1.75c a pound, though the usual figure stays at 1.80c. Shapes are irregular, ranging from 1.75@1.90c a rregular, ranging from 1.75@1.90c a

pound.

Fig fron has been in very good demand, especially in Chicago, New Engaland and eastern Pennsylvania. In the first district about 100,000 tons have been sold since Aug. 1. At Philadelphia 25,000 tons changed hands last week, and in New England about 12,000 tons. district Dutch and German fron has been offered at new low prices, or \$3.50@4 a ton under the price of Buf-

About 12,000 tons of foreign from is in storage at Providence and a less connage at South Boston, with more cargoes due to arrive. When domestic from makers realize these circumstances they do not hold firm to their attempted higher levels. Thus the New York Central recently purchased from

attempted higher levels. Thus the New York Central recently purchased iron at \$18. Buffalo, whereas the price is supposedly \$19. Prices of British steel making irons have been dropping gradually and are now so low as to encourage considerable purchasing on the part of Americans. However, British foundry iron is still too high to be shipped here.

### Cast Iron Pipe in Demand

Cast Iron Pipe in Demand

One of the liveliest topics in steel circles today is what the steel ingot capacity of the United States should be considered. Figures mentioned range from 34,750,000 tons yearly to 58,000,000 tons per annum. It is now urged that the American Iron and Steel Institute re-rate the various steel companies in a thorough manner and find the true theoretical capacity. Cast Iron Pipe is again prominently Cast Iron Pipe is again prominently demand, with Detroit, the largest

### LARGE GAIN BY MAINE CENTRAL

### Surplus in 6 Months Equals \$18 a Share on 5 Per Cent Preferred

In the six months ended June 30 the Maine Central Railroal earned a substantially larger surplus after charges than in the entire 1924 year. The balance of \$544,600 after all deductions was equivalent to \$18.15 a share on the \$3,000,000 5 per cent cumulative preferred stock, comparing with a surplus of \$107,885 or \$3.59 a share in the first six months of last year and a balance of \$389,022 or \$12.96 a share in the full 1924 year. 1924 year.

June alone produced a surplus of \$155,106, constituting the best month of the year to date with the exception of March. July will not come up to this showing, as business dropped off, but fixed charges for the month were amply covered. August to date is showing improvement over July and the outlook for the autumn months is considered good.

the outlook for the autumn months is considered good.

Business at the summer watering places in Maine is very good this year and White Mountain resorts are having an excellent season. Maine Central's two large hotels, the Mt. Kineo House on Moosehead Lake, with accommodations for 500 people, and the Samoset at Rockland Breakwater, with capacity for about 300, each samoset at Rockhand Breakwater, with capacity for about 300, each have more guests than last year. In spite of the larger influx of tourists into Maine, however, Maine Central'a passenger earnings are running 10 per cent behind last year, due largely to increased use of automobiles and busses.

busses.

Maine Central has itself gone into the bus business, having recently incorporated the Samoset Company, operating motor coaches between various points and also running a freight truck service. Freight earnings of the railroad have been running ahead of last year since April. The big improvement in road's net income has, however, been made by reduction in expenses. Net earnings of the second half of

Net earnings of the second half of 1925 will probably not be so large as in the first six months, but a showing of \$25 a share on the preferred stock for the full year would not be sur-prising, more than twice the earnings of 1924. If this is realized further liquidation of the accrued dividends on the preferred may be expected. There was originally \$29 a share accrued, but \$2.50 per share was recently paid off leaving a balance of \$17.50.

### IMPORTANT DAYS FOR NATIONALS

Pittsburgh and New York Are to Meet Again This Week-End

NATIONAL LEAGUE

RESULTS SATURDAY Boston 10, Philadelphia 4, Cincinnati 8, Pittsburgh 1, Brooklyn 3, New York 1, St. Louis 4, Chicago 2, RESULTS SUNDAY Roston 6, New York 0, New York 6, Boston 2, Incinnatl 6, Pittsburgh 1, Philadelphia 7, Brooklyn 6, Philadelphia 9, Brooklyn 2, N. Louis 6, Chicago 2,

The next eight days promise to be important ones in the National League baseball championship race, especially the last three. The real battle for the pennant continues to be between Pittsburgh, New York and Cincinnati with the teams remaining in about the same relative positions they have occupied during the past two or three weeks. Pittsburgh continues to occupy the position of honor, but its margin of 3½ games over the New York Change is not large enough to assure

GAME TODAY

hiladelphia at New York.

of 3½ games over the New York. Giants is not large enough to assure it of finishing the season in first place, while the Champions are in turn leading the Cheinnati Reds by a similar margin which is so small that a week or two could wipe it out.

Figuring from the showings made by the clubs to date, New York and Cheinnati should have a chance to reduce Pittsburgh's margin the first of this week as, beginning Tuesday, the Giants will play a series of rames at s are going to be caught. Brooklyh lift be especially anxious to win a marity of these games in order that it ay secure a first-division position by ading St. Louis which will be playing set of the period fouring that time.

\*\*NEWARK, N. J., Aug. 17—Forecasts were upset at the Velodrome last night when Orlando Plani, the Italian arider, two the five-mile national championship face, the eighteenth of a series of 24 fraces to decide the title, by defeating Ray Eaton and Arthur Spencer, while Fred Spencer won the heat to decide fourth without and A. Goullet. Fred Spencer, while Fred William Spencer, the three leaders in the point standing, were all shut out in the semifinals. Fred Spencer is still leading in the race for championship with 34 points.

### Hobbs Ties World Cricket Records

By The Associated Press Taunton, Somersetsh'r, Eng. Aug. 17 MOST Britishers throughout the world are today rejoicing, for the mighty J. B. Hobbs has scored his 126th "century," thus equaling the world's record set by Dr. W. G. Grace in 1904.

England's batting king also equaled another record, that of scoring 13 centuries in a single season. This was held by C. B. another famous old-time Dr. Grace, who was known as

"the greatest cricketer of all time," made his record over a period of 40 years, while Hobbs has been playing only since 1905.

Thousand's saw him equal the record. When the game was adjourned Saturday night he had only nine runs to make, and special trains were found necessary to transport all the enthusiasts

deago while Philadelphia is at Cin-bunati and Pittsburgh is entertaining suit of the finals at the South Side ooklyn. The last named team ould certainly give the leaders more buble than the Cubs or Phillies buble than the Cubs or Phillies buble accompanies of the least as a re-suit of the finals at the South Side Tennis Club grass courts. While the west claims the major title, with C. W. Holman of San Francisco owning the junior singles crown, the east shows thould cause New York and Cheinnau und, if the two last named do not suc-ted in cutting down "Pittsburgh's Johnson Jr., and M. T. Hill of Waban, oresent margin during those days, it is infficult to see how the present lead-bers are going to be caught. Brooklyn by the companion of the companio

are expecting such an outcome. A margin of one game in favor of either club will be about all that can be expected.

During that time Cincinnati will be playing against Boston and the Reds will have their best opportunity of reducing the margin between them and the leaders. Unless the Reds are able to gain some ground on Pittsburgh this week, prospects of first place will be rather slight as the season is fast roming to an end.

Philadelphia, Chicago and Boston will undoubtedly occupy the last three places in the standing when the season closes and that will probably be the order although Chicago still bas a chance of passing Philadelphia, the present margin being three

heat for second and third in 2h. 29m.

46s. One second later, Jackson Park.

2d., and Verona tied for fourth and fifth.

MISS COLLETT EQUALS RECORD
PORTSMOUTH, Aug. 17—Using four bisques as a handlcap; two on each nine, Miss Glenna Collett, ex-United States woman golf title holder, and Miss Helen Payson, Maine state champion, finished all even in an 18-hole match on the Hotel Wentworth course today, with Whitney Bowden of New Orleans and E. R. Murphy of Boston. Miss Collett was at her best, again equaling her course record of 73, which she made Saturday, when, paired with Murphy, she defeated Whitney Bowden of New Orleans, ex-southern champion, 5 to 3.

SCHAWNA WINS RACE AGAIN SCHAWAA WINS RACE AGAIN
BAR HARBOR, Me., Aug. 17—For the
second successive time, the Schawna, an
Xewanhakas schooner owned by Dr. S. M.
Milliken of New York, won the annual
ocean race of the Bar Harbor Yacht Club,
sailed over a 26-mile course Saturday.
Conditions were ideal and the winning
boat made the distance amid the varying
winds in 4h, 20m. 42s.

# Junior Polo Title

Captures Championship by Defeating Bryn Mawr, 12 Goals to 3

RUMSON, N. J., Aug. 17—Another pony polo championship title belongs to the United States Army four as the result of its easy victory over the Bryn Mawr four here Saturday, 12 to 3. This time it is the junior cham-pionship of the United States that the ASHEVILLE, N.C., Aug. 17 (Special)
—It took Edward Pfeiffer, star tennis player from Louisville, just three sets to win the tennis championship of the south from F. C. Owens of Atlanta, here Saturday afternoon in the finals of what was probably the most successful tournament the Southern Lawn Tennis Association has ever had.

Owens, champion in 1923, had little chance in the match and never won more than three games in each set. He was not the equal of the Louisville player, which fact was proven time after time throughout the match. There was little difference in their serves, but Pfeiffer had a decided advantage in court generalship, in backhand strokes and in accuracy of place. serves, but Pfeiffer had a decided advantage in court generalship. In backhand strokes and in accuracy of placement. Pfeiffer was the more aggressive and possessed a surprising amount of reserve.

The new champion played a backcourt game, while Owens worked his court game, while Owens worked his

### JAPAN REACHES THE THIRD ROUND

Defeats Spain in Davis Cup Match, 3 to 2

BALTIMORE, Md., Aug. 17 (P)-Japan won the right to meet Australia in the third round of the Davis Cup preliminary matches by halving the two singles matches with Spain at the Reliment Country Club Sat at the Baltimore Country Club Sa Takeichi Harada, Japanese star,

Takeichi Harada, Japanese star, proved himself the master of the Spanish captain, Manuel Alonso, in a thrilling match, 2—6, 6—4, 6—3, 6—4. Eduardo Falquer of Spain, who lost to Harada in the first day's play. showed improved form in defeating the Japanese veteran, Zenzo Shimizu. 3-6, 6-0, 6-3, 6-4, but the day had already been lost for Spain. Japan had won the round, 3 matches to 2. In defeating the brilliant Spanish leader, Harada played his usual high brand of tennis. The veteran Alonso took advantage of his temporary unsteadiness in the first set to lure Harada into errors, but Alonso was neved a serious contender thereafter with victory for Japan deprived the Flaquer-Shimizu match of much of its interest, and play was slow and listless. Flaquer, however, who played his lost to Harada Thursday, was far more accurate in his volleying and and Washington—is offered the fans first match in this country when he

### Scottish League Season Started

Leaders Get Off Well in the 1925-26 Race—Changes

LONDON, Aug. 17-Both the Glasgow Rangers, league champions, and pionship race which began Saturday strenuous opposition from the Browns and which is invested with special in during the three days for the Browns

pionship race which began Saturday and which is invested with special interest owing to changes made in the rules of the "soccer" code during the close season.

Many critics were of the opinion that alteration of the "offside" rule so that the attacking player is onside provided he has two opponents between himself and their goal net would change the nature of the game very considerably, but apparently it has not had that effect. Saturday it did not produce a glut of goals as some thought it would, but it served to eliminate many breaks in the continuity of the game and the general opinion is it will prove a very beneficial change.

ton tennis captain, 6—4, 6—2, in the opening match of the tournament to day.

The youthful New Yorker gave his digtinguished rival a battle in the first set, games going with service until Johnston broke through Dailey's service in the tenth game to win the set. It was a second-round match, both drawing byes in the first round.

W. J. Clothier of Philadelphia, United States champion in 1996, was

prevent interruptions in the game, is an amendment of the rule governing the throw-in from touch. Fullbacks have not hesitated in the past to kick the ball over the touchling arther them. the throw-in from touch. Fullbacks have not hesitated in the past to kick the bail over the touchline rather than keep it in play at the moments of pressure, knowing that the throw-in conferred little benefit to the side taking it. Now, however, as the thrower is less hampered as to stance and can make some real use of the law, defenders will have to think twice before they deliberately send the ball out of bounds, especially when they are in the region of their own goal.

After Strong Eleven to Play

The two-out-of-three. In the two-out-of-three. In the two contests they won they were carried to six and seven innings without a score and then were blanked 5 to 0 in the second game of Saturday's double-header. With the exception of Friday's game, when they made 12 hits, the visitors were held to six and five hits in the double-header. Washington, too, had trouble when the Yankees invaded Friday, and although the Senators managed to win all three games, two of them were close, 2 to 0 and 3 to 2. These were the seventh and eighth-place teams offering the leading first and second-places nines severe opposition. With this in view, it is not too much to look for signs of pressure almost daily on one or the other.

After Strong Eleven to Play

(Special Correspondence) — Australia is making preparation to send its best eleven to England next year for the purpose of retaining the historic "Ashes" which symbolize the premiership of the cricket world. Ever since ship of the cricket world. Ever singe the war Australia has been pre-eminent at cricket; but the team from England which visited the Common-wealth this year was defouted by wealth this year was defeated by such a narrow margin that the question as to which was the better side was a matter of debate.

TORONTO GIRLS
WIN TWO Certainly Australia won the rub

Certainly Australia won the rub-ber, but England was handicapped by the fact that many of her represen-tatives did not strike their true form while out here. On the other hand such men as J. B. Hobbs, the Surrey champion, Herbert Sutcliffe, the Yorkshire batsman, and M. W. Tate, of Sussex, one of the finest bowlers seen in Australia for many years. seen in Australia for many years, stood out above all the local players, and if they had been ably supported, they would probably have taken the "Ashes" back with them.

# EAST ATTACKS WESTERN TEAMS

Fans Look for Break in Even Pace of Leaders-Two-Game Margin Held

AMERICAN LEAGUE RESULTS SATURDAY

Philadelphia 3, Boston 1, Beston 5, Philadelphia 0, Washington 6, New York 1, Chicago 12, Detroit 5, St. Louis 3, Cleveland 0, RESULTS SUNDAY

New York3, Washington 2. Cleveland 7, St. Louis 6. Detroit 11, Chicago 9. GAME TODAY Letroit at Chicago

An excellent opportunity to make a comparative test of the two lead ing contenders for the pennant in the this week. Following a week of play, this week. Following a week of play, the Athletics held to a two-game margin over the Senators, and this week both teams are invading the west on road trips. Soon one team or the other is likely to show the effects of the pressure of the race, and these road trips, particularly this week, may be the time.

be the time.
With the exception of a scheduled game between Detroit and Chicago in the latter city, no games are sched-uled today. Tomorrow, however, the eastern teams attack, in full force. Philadelphia centers its attention on the St. Louis Browns in St. Louis, Washington invades Cleveland, New York visits Detroit and the Boston Red Sox open an engagement in Chi-

cago.
The Athletics are likely to meet with are certain to recall the three-out-of-four they lost in Philaeldphia the first of last week. Washington may meet similar resistance from the Cleveland Indians, who, like the Browns, were treated roughly in Washington. The Browns and Indians won only two games and lost five during the past Detroit secured fourth place in the

standing from the Browns last week and in entertaining the New York Yankees, Tuesday, Wednesday and opinion is it will prove a very beneficial change.

Until this season a player had to have three opposing players between himself and the net, and it was possible for fullbacks to turn the law to their own advantage without resource to any football. Thursday, should prosper while St. Louis faces Philadelphia. The Red Sox

sive play.

The other alteration, designed to day and Saturday has started harmless rumors over the circuit. The league

It is proposed to devise a plan whereby parcel lots can be loaded on ships without shifting the loaded on ships at the loaded on ships without shifting the loaded on ships at the loa

season of navigation, has approached the record attained by Montreal in 1924, when, for the fourth consecutive season and with only seven months of open water, it led the world in volume of grain handled. The figures were 165,000,000 bushels received and 159,000,000 shipped.

159,000,000 shipped.

The port of Montreal has a capacity of 1000 ships, it is stated, including those anchored in the stream. A 30those anchored in the stream. A solution foot channel affords access for ocean vessels to the port. Ships berth sideon at modern stone quays, several small basins offering protection from the swift current of the river.

The port is operated by a harbor commission of three members reporting to the Minister of Marine. In addition to the quays, the Government has built a belt railway of 15 miles or the Marker of Marine. ound the harbor. The Harbor Comaround the narbor. The Harbor Com-mission operates grain elevators, with a total capacity of approximately 12,-000,000 bushels, including a floating elevator whence grain is loaded from lake vessels to ocean ships without ng into storage

The lake boats bring the grain from puluth, Fort William or Port Arthur of Montreal during the seven months navigation, while the remainder of year, the traffic moves all-rail. It is almost all bulk grain, according to J. K. Smith, transportation manager of the Board of Trade, who notes that in addition to the 4,662,000 tons of grain, a similar tonnage of general nport and export freight was handled

stock and brick.

Room for expansion of the growing port of Montreal exists in unused space to the eastward. A total of 988 transatlantic and 235 coastwise ships cleared last year, the great majority being British. The extent of the piers and quays in deep draught (25 to 30 feet) is 8½ miles.

Passenger traffic included 131 lines carrying 32 000 incoming and 42 000 the establishment of cheaper freight rates, and we shall urge construc-

carrying 32,000 incoming and 42,000 outgoing passengers, in addition to 110,000 local passengers on river and lake ships. Montreal's progress as a port may be traced not only to its topography, but to civic enterprise, adequate banking facilities and modern port machinery and appliances, it is declared.

Ships of the Munson Line from New Orleans have been added to the list of lines leaving that port on which The Christian Sigence Monitor and other authorized Christian Science 4 4 4

## **EDITORIALS**

The troubles in China call attention once more

to what is perhaps the supreme international

BOSTON, MONDAY, AUGUST 17, 1925

problem of the twentieth century, the readjustment of the relations between the civilizations of and the West and the East. Europe and America are West still, no doubt, the center of energy and prog-

ress in the world. But Europe is preoccupied, at any rate for the moment, with rebuilding itself after the desolation of the long struggle for democracy and national freedom which ended in 1918. Asia, on the other hand, is changing with immense rapidity under the impact of Western ideas, and the problems which that change is creating, especially for the Englishspeaking peoples who are most in contact with that continent, are increasing every day.

Fundamentally, of course, the unrest in China is healthy. It represents the breaking down of the traditional modes of thought and conduct which are no longer adequate for the quickmoving world in which we live today, and the reaching out for new methods and new ideas. In the process there is necessarily confusion, in which both good and bad elements come to the surface. On the one side we see the devotion and idealism of both Young China and Old China in their efforts to regenerate their country. On the other side we see selfish militarism, calculating greed, and subversive propaganda, seeking to profit by the turmoil for ends of their own. The exact outcome no one can yet foretell. It is essential, however, that the process should be recognized as fundamentally one of growth, and that the good wherever it may appear should be encouraged and assisted.

When we come to consider, however, the relations which should subsist between China and the outside world, a more difficult problem presents itself. If China, in its efforts to remodel its life, goes through a period of internal chaos, that is its own affair. But if China cannot prevent that chaos from beginning to upset the welfare of its neighbors, still more if it becomes involved in a positive movement to embroil foreign nations or their citizens in that chaos, it automatically surrenders its title to be left alone to manage its own affairs. And that is the position into which China has drifted today. The chaos of the last five or six years, in which China was left to work out its destiny for itself, has now taken a form which actively threatens the well-being and interests of many other

To say this, is not to ignore by any means the responsibility, of the great Western powers in the past. Their record has too often been in the wrong, from the opium war nearly a century ago to the presentation of the twenty-one demands during the World War. Before they can deal effectively with the present position in China the powers must manifestly put themselves in the right. They must abandon altogether any selfish designs on China. They must be willing, and indeed anxious, to concede it any change of status, whether in the matter of control over its own services and ports, or in the matter of extraterritoriality, which is warranted by the facts of China's own growth in responsibility and orderly government. They must be ready, in a word, to treat China as they themselves would wish to be treated.

aspect and in view of the enormous ment in the attitude of the powers toward China since the war, it is the less important aspect. The more important thing at the moment is that the Western powers should make it clear to China that the essential preliminary to any change in extraterritorial rights is that the Chinese should show some sign of being able to set their own house in order.

It is the fashion now in China and elsewhere in Asia to picture the foreigner as nothing but a tyrant and an exploiter, and to justify the beam in the national eye by/pointing with everincreasing excitement to the mote in the foreign' eye. This is really an absurd exaggeration. Paint the misdeeds of the foreigner as black as they can be painted, and the fact remains that he has built up the greater part of the foreign trade of China on an honest basis; that he has constructed most of the railways and practically all the prosperous, clean and well-administered cities in the country, and that the only efficient revenue departments in China are those which the foreigner controls.

Many people in recent years have pointed the finger of suspicion at Japan, and no doubt there have been aspects of Japanese civilization and policy which at times have given some ground for uneasiness. But on the fundamental issue which is at stake in China today Japan has pointed unerringly to the real line of advance. Once Japan had determined after 1863 to modernize her life, she set to work to find out how the West had won its successes, she industriously and quietly put into effect what she had learned, and when she had made good she courteously but firmly asked that the foreign privileges appropriate to her earlier state should be abolished, and they were abolished without flurry or fuss. That is the truth about the present situation in China. The relations between China and foreign powers can only be placed on a satisfactory basis when China has taken some practical steps to set its own house in order. And it is those who press this truth upon her leaders, gently, politely, but without hesitation or disguise, however unpalatable it may be to idealists and nationalists in a hurry, who are China's truest friends.

Jazz music undoubtedly originated in the United States: With equal certainty it may be

said that the development of the radio there "Jazz for the use and enjoyment of the general pub-Across the lic is ahead of what it is in any other country. Sea" But the British are not far behind. For better

or for worse-depending upon whether or not one favors these modern 'theoretically, that a law that benefits the peo-

innovations—Britain is about to turn the tables on America.

The "Savoy Orpheans," or the Savoy Hotel Jazz Band, which plays for the delectation and dancing of listeners-in all over the British Isles, as well as the supper guests of the hotel every night, is now to be made available to American listeners every Saturday night by a specially late radiocast, relayed from the Savoy ballroom by the most forceful radiocasting station in the world, 5XX, the new high-power station of the British Broadcasting Company, which has just been established at Daventry in Northamptonshire, England.

"Hands across the sea" between Great Britain and the United States has become a gratifyingly frequent phenomenon in many lines of thought and activity, and now we are to have jazz across the sea as a regular thing as well. When the Strand supplies the music for Broadway's dancing, may we not feel that international harmony is well on the way?

Representatives of the National Grange and of the American Farm Bureau Federation have

The Farmer Postal Rates

submitted to the joint Congressional committee, which is investigating conditions affected by the increased postal charges imposed by the Sixty-eighth Congress, briefs setting forth the demands of the farmers

for a readjustment of rates. In the actual operation of the amended schedules, it is claimed that the people of the rural districts are paying an unduly high share of the increased rates, and it is urged that instead of seeking to make up the deficit, incurred through the advance in wages of postal employees, by adding to the cost of parcels-post, an effort should be made to cut down expenditures by the elimination of unnecessary features of rural free-delivery and other services.

The American farmer has grown so accustomed to being lectured by wise city folk upon his alleged shortcomings as a producer, that it can be imagined that the farm critics of the postal department found a quiet pleasure in being able to show that there is a serious lack of co-ordination and economic management in this great governmental service. When the farmers complain of low prices for their products, because of over-production or for other reasons, their political friends are always ready to point to what the Government, through the Department of Agriculture, is doing to help them increase their output. If the farmers would only work harder, and more efficiently, they are told, they would all become prosperous. Aside from the query as to where the farmer is to find markets for all the additional crops he is urged to raise, it is possible that the men who have been engaged in agriculture for generations may have doubts as to whether Government officials, and so-called experts, are of so much benefit after all. It is at least putting the shoe upon the other foot when the farmers are able to make out a good case against the haphazard methods of the Congress and Post Office Department in dealing with a situation created by the necessity for higher wages to postal employees.

That each addition to the charges for parcelspost or other services to the rural districts is in most cases paid by the farmers, would seem to be pretty clearly established. Thus if there is a higher carrying charge on goods bought by the farmer in the towns and cities and But this aspect of the problem is only one shipped by mail, the additional rate is either directly or indirectly added to the bill. While the amount of the increase on each shipment may be small, in the aggregate it makes a considerable item in the annual budget. Higher rates also operate to discourage the use of the postal service in shipping certain farm products to individual urban customers. When the investigating committee comes to make up its report it will have to give careful consideration to the farmers' plea for fair treatment.

> Since time immemorial, almost, or at any rate since that day when communities of men and

The Devious Ways of the Smuggler

women happened upon the theory of protecting their own rights and privileges by forbidding entirely, or by regulating the terms of commercial interchange with the peoples of other communities or countries, hu-

man ingenuity has sought out ways in which such restrictive rules might be profitably violated. In former times, if one is to accept as more or less authentic the tales of adventure describing the operations of bands of smugglers. there was much of romance and daring to mark their experiences. Always these freebooters have been the avowed and conscious enemies of society, as society is represented in laws and ordinances. In older days, when these laws were simply the edicts of some unpopular king or other ruling sovereign, the populace sometimes looked approvingly upon the efforts of the smuggling gentry to supply them with those commodities which, in the ordinary course of trade. were unobtainable because of prohibitive prices. Then, as perhaps now at times, the skulking border runners were aided and, in an emergency, shielded by the very people whose laws were being violated.

Many a boy, youthful or grown-up, has followed the exploits of these adventurers far into the night. Perhaps some of those who read have secretly wished that they might share in the exploits described. Possibly they have been unable to regard the offenders, somewhat sympathetically introduced, as vicious violators of a just law. Captains and crews have been followed in their not wholly selfish efforts to carry food and clothing to friends and neighbors in need. There is romance in such adventures, and, rightly or wrongly, the sympathies of the

youthful camp follower were aroused. But all this romantic tinge has been destroyed as civilization has advanced. Crime, of whatever degree, is less complacently regarded. In the United States, and elsewhere where the people themselves have a voice and vote in making their own laws, it has been agreed, at least

ple collectively benefits, or should benefit, the individual. So, at least to that degree, special privilege is frowned upon. The smuggler who cheats the customs and thus robs the people as a whole for the selfish benefit of himself or a few, is no longer regarded popularly as a hero. He has fallen into the category of the common criminal offender, no matter what his former social position.

It would be somewhat difficult, one imagines, for even an adventure-loving American boy of the present generation, who by chance might be brought into actual contact with the modern smuggler of illicit liquors, to supply for this violator of the law the cloak of romance with which his less selfish predecessors were invested. The rum smuggler has added to his other crimes those of bribery, subornation of perjury, homicide, and many other of the crimes forbidden by every known law. His calling was never a high one, but he has even succeeded in debasing that while earning for himself the contempt of all decent persons.

Publication, recently, of the conclusions of a western college professor, a student of sociologi-

The

Villages" of

"Deserted

cal problems, to the effect that the future American city will be practically a city without homes, calls interested attention to the fact that in this transition there is almost a complete departure from the custom

the Future which once found expression in the establishment of centers of population. Originally, it must be agreed, even in those earlier days when every tribe and every clan sought to establish its social and economic independence, the public or community storehouses were the centers of the home sections, easily available to every member of the band which they were designed to supply. In those times necessity, rather than

mere convenience, impressed upon community

dwellers the wisdom of putting all their eggs in

one basket, as it were, and then of watching that

basket. Tribal conflicts and clannish strife

might otherwise cause the families of the warriors to be cut off from the source of their supplies and leave them without any other recourse. But as civilization has advanced and as means of communication and transportation have been provided and improved, vast numbers of people have come to reside in seeming security with available food supplies sufficient for only a few days. Take, for instance, the cities of Boston, Chicago, New York and Philadelphia, as well as others throughout the United States. At no season of the year, it is safe to say, does any one of these cities contain within its borders, or within a radius of one hundred miles, enough

of even the staple foods to supply its population.

for a month. This condition could not continue were it not for the facilities which have been provided for transporting these commodities long distances in a comparatively short time. Even with these improved methods of transport, such processes could not be relied upon except under the assurance that a measure of industrial peace will be maintained, that no tribal or sectional warfare will break out between two days, and that there will be no refusal of at least necessary cooperation between producers and consumers.

So it seems that while something that might be called a cruder civilization than that which we now boast of inspired the establishment of the earlier cities or communities, an advancing civilization is gradually changing the physical aspect and character of those same centers. With the assurance of permanent peace among kindred peoples, and with the hope that eventu ally this peace shall be universal, no thought is taken of siege or blockade, either upon land or sea. The people of every section share without hindrance or protest in the bounties of every other section. Swift trains and boats have paved the way which one day will be more quickly traversed by airships laden with the earth's riches. No stockades or mounted guns are needed to assure safety from hostile marauders. The outposts of this newer and better civilization which understanding has ushered in are the broad prairies, the friendly hills and the sheltering woods. Along, upon, and in these the released and happy dwellers and homemakers are residing, gradually forgetting that circumscribing tradition which impelled them to seek protection in numbers and behind ancient city

## Editorial Notes

Notwithstanding the fact that the word 'Klondike" conjures up visions of wealth uncountable, in hard reality the tragedies associated with the goldfields of that region were many in number and terrible in nature. Hence it is not surprising to learn that, though many stories have gained currency that the Red Klondike—that is, the newly discovered Alden goldfields in Siberia-are rich bevond estimation, the newspaper Kommunist says that the reports exaggerate the ease with which gold may be obtained at these goldfields, and unemployed wander about there begging a crust of bread. According to official Soviet reports, already some 12,000 gold prospectors have found their way to this section of Siberia, and it appears that an "Aldanzoloto (Aldangold) Trust" has been formed to organize the gold industry and take charge of the diggers' gold.

Though his theory that education should lay a general foundation rather than follow special lines may not be a popular one—according to Sir Robert Horne, who spoke recently at a luncheon given in conjunction with the City of London Vacation Course—there is little doubt that it is substantially correct in its definition. Learning should not be something to be avoided, he urged, but to be longed for and desired. And then he made this inspiring appeal to the teachers of Great Britain:

It is a great nation to which we belong. We have inherited a character which, without offense, we may say has carried the best elements of modern civilization throughout the world. The Nation is struggling with grave difficulties. We have many problems to solve, vicissitudes and misfortunes through which to pass, before we can emerge to a brighter future. We want a steadying influence to be exerted, and you can play a great part in steadying the character of our young people. It is that steadiness of character which has enabled us to take the place we hold today.

## Bryan: A Memory

Dining on the terrace of a hotel overlooking the busy and Canal at Venice, I was indifferently conscious of conversation of people at an adjoining table. Amerito wring concessions from "the money power." "We demand and the terrace of a hotel overlooking the busy plead, no more," he cried, after recounting past efforts to wring concessions from "the money power." "We demand and the terrace of a hotel overlooking the busy plead, no more," he cried, after recounting past efforts to wring concessions from "the money power." "We demand and the terrace of a hotel overlooking the busy plead, no more," he cried, after recounting past efforts to wring concessions from "the money power." "We demand and the terrace of a hotel overlooking the busy plead, no more," he cried, after recounting past efforts to wring concessions from "the money power." "We demand the terrace of a hotel overlooking the busy plead, no more," he cried, after recounting past efforts to wring concessions from "the money power." Grand Canal at Venice, I was indifferently conscious of the conversation of people at an adjoining table. Americans clearly. How the table d'hôte, to which they seemed to bring excellent appetites, compared with those dis-pensed in the neighborhood of Times Square, and how amazingly moderate were the prices of silk shawls— Black, with the most gorgeous flowers, and such a fringe, my dear!"-were topics that engaged their attention until my interest was roused by the question, "Did you see about Bryan?" What followed sent me hurry-ing into the hotel for a paper, and there, in the allinsufficient brevity of a cable dispatch, I read the news.

So that was the end! I write on an Italian steamship

making slow passage down the Adriatic. It is July, 1925. In July, 1896, I sat in a sweltering convention hall in Chicago, so close to the orator that I could almost have touched him, and saw and heard him rouse 15,000 people to such outbreaks of passionate enthusiasm as in a quarter of a century of attendance upon conventions I have never seen paralleled. Don't trouble to seek out and reread the speech today. In the cold monotony of type it will seem but sophistry and fustian. But it fitted admirably the need for which it was designed. The moment was one of widespread industrial depression and agricultural distress in the United States. The convention there gathered was made up overwhelmingly of those chosen to represent the suffering classes. There were just enough representatives of what came to be called 'the plutocracy" to infuriate the majority. Whitney, Roswell P. Flower, David B. Hill, Bourke Cochran-millionaires or the parasites of millionairessat in a solid phalanx with their followers, conscious that they were beaten in the convention, but laying their plans for revenge at the polls. "The free coinage of silver at sixteen to one without awaiting the action of any nation on earth"-how ancient and moss-grown a phrase it sounds today!-was the shibboleth by which men were judged in that convention. To discard it was to be branded a "gold-bug" and a "plute" (short for plutocrat), while to uphold it, as some of us learned later to our cost, was to be an anarchist and a betrayer of the national honor! 4 4 4

If ever destiny, fate or circumstance seemed determined to thrust one man to the fore and make him a central figure of dispute for a quarter of a century, it was in that convention. William J. Bryan was not even a delegate. He came at the head of a contesting delegation which was seated only because the silver faction needed its vote. He was barely thirty-five years old—a fact impressed on me by the retort made by Governor Altgeld when I went, at Bryan's request, to seek the support of Illinois for his candidacy. "Tell him to wait about eight years," said the Governor in no unkindly tone. "He's too young today." Nor had any particular prominence in the convention been planned for the young Nebraskan. He told me the day before the convention met that he had a speech prepared which would nomi-nate him if delivered. Would opportunity be offered? Here again destiny intervened. Senato David B. Hill of New York, a man of great ability, and the bête noire of the silver men, was temporary chairman. His speech was an attack on the silver issue, to which a majority of the delegates clung persistently. A very distinguished western senator had been assigned the task of answering him. But the hall was indescribably hot, the proceedings were slow and nerves were on edge. Prohibition was a safeguard for statesmen and others not then dreamed of, yet the western senator was one to who inhibitions would have been most salutary. At the moment for action he was missing. Senator James K. Jones, floor leader of the silver forces, was in despair when a note was handed him saying that Bryan Nebraska had a speech which would be a complete rejoinder. With resignation, rather than enthusiasm, though Bryan had even then some repute as an orator growing out of a tariff speech made in the House of Representatives, the Senator acquiesced. The young Nebraskan, full of life, vigor and enthusiasm, fairly leaped to the platform, and almost with his opening sentences made the convention his, to do with as he willed. At last the inarticulate forces of discontent had found a clarion voice!

Could this be the speech which he told me he had prepared! Every phrase seemed to be designed to meet some argument advanced only a few moments earlier by the champion of gold. The retorts were apt, goodhumored and convincing. The orator's wonderful voice which, later, thirty years of strenuous use hardly impaired, reached to every corner of the great "wigwam. His predecessors had been heard by perhaps a third of the convention; he won the instant attention of everyone in the hall. His face, which when I last saw it was worn and seered by a lifetime of hard struggle, was then boyish in its enthusiasm, compelling in its earnestness, almost apostolic in the fervor of the conviction it expressed. As he progressed, his words became less argumentative, more passionate. He pleaded for the worker, for the small business man, for the men and women of Some phrases cling in my memory today 'The man who with pick and powder in the bowels of the earth brings forth the precious metals is as much a business man as he who in a Wall Street office plans to corner the money of the world." From argument he humble ourselves no longer. We demand and we defy!

Orotund, resonant, sonorous and at times musical his voice boomed out through the fetid atmosphere of the great shed, sticky with the odor of pitch-pine and fetid with the reek of 15,000 sweltering humans. For minutes there would be tense silence, broken only by the orator's tones. Then, like the crash of ten thousand broading would be the crash of ten thousand broading would be the crash of ten thousand broading would be the crash of ten thousand breaking waves, the roar of the multitude broke forth.
I could look into the faces of the throng. Men wept,
broke into laughter, or cried out in rage, as at some melodrama when a farcical scene turns swiftly into tragedy. Two-thirds of the delegates were almost constantly on their feet in applause—the little group from the eastern states sitting sullenly silent, striving not to show the smart of the lash. A young man destined to become later a millionaire politician of Illinois, buying public privileges right and left, debauching city councils and state officials, turned to me in alarm. They'll nominate him sure," he said, "and mark my words, that fellow is dangerous!"

. 4 Nominate him they did, but not at once. "If my boom won't last over night, it certainly will not last to November," was the answer he sent to Senator Jones's inquiry when the speech ended, as to whether they should pro ceed with the balloting at once. I was with him the next day in his quarters in one of the most second-rate of Chicago's second-rate hotels when the news of his victory came. Some idea of the limited extent of his preparations may be derived from the fact that when his single room was crowded with politicians the only place for consultation was on the edge of the bath tub.

From that hour until the final summons in solitude in an obscure little Tennessee town, Bryan lived in the fierce glare of publicity. I doubt if any man, even Roosevelt, whose end curiously enough came likewise in the solitude of his chamber, unattended, ever had so great and so devoted a body of personal followers. Leaders drifted away from him, it is true. He had a personal dominance and a way of insisting on his own convictions that were not palatable to political bosses. Among men whose names and views count in political councils he had probably not nearly so many friends as he pos-sessed at the time of his first defeat. In each campaign he would win back many, but between campaigns he had a curious faculty of estranging his friends.

Setting aside alike the religious and the pseudo-scientific phases of the controversy over evolution which occupied his last endeavors, it is probable that his par-ticipation in it offended nearly all of his more eminent friends. It made him more than ever unavailable as a presidential candidate. But whether it did or did not crease his personal following is a question, for it left him as the unquestioned leading champion of unfaltering orthodoxy. It strengthened the conviction, in which even his foes shared, that here was a politician, a member of a tribe held in light esteem, who was at the same time a man of religious convictions ready to brave ridicule—which to the politician is worse than death—in their defense. To the great mass of the American people; even in these days which some like to call flippant, thoughtless and degenerate, this quality arouses high admiration. Hundreds of thousands of people, irrespec-tive of politics, said when they read the news from Dayton, Tenn., "Well, Bryan was certainly a good man." + + +

The verdict is just, but the qualities which compelled t are not those which lead to success in politics. wonders what would have been the Bryan career had he thrown himself at the outset as unreservedly on the side of wealth and privilege as he did in 1896 on that of the inarticulate masses. Though in nearly all political matters of present-day discussion essentially conservative, Bryan bore to the end the stigma of being radical. Himself a.man of wealth, accumulated by his own untiring efforts, he was widely looked upon as the enemy of wealth. A devoted defender of hopeless causes, he was speered at as a mere demagogue seeking political popul larity. That he had been thrice defeated for the Presilency overshadowed the fact that in defeat in 1896 he polled more votes than were cast for Woodrow Wilson victorious in 1912, though the electorate had by then greatly increased in numbers. Denied his crowning ambition, he met his end in the midst of a struggle which to many of his friends seemed unworthy of his talents. Yet knowing his life as I have, touching it intimately at points frequently separated by years, observing his career from the viewpoint of a journalist and a sympathetic friend, I am unable to see in it anything of waste or of tragedy. For from his earliest entrance upon public life William Jennings Bryan was his own man and none other's. He preached and fought for his honest convictions and steadily refused to champion issues which his mind condemned. He rejected, even brusquely, offers of powerful aid based upon his acceptance of political policies repugnant to him. Many of his beliefs may have been erroneous, but they were his, and in the arena he did battle for them and for them alone. He was not, perhaps, to paraphrase Henley's line, master of his fate. Indeed, I think no mortal man is ever quite that; but he was at all times and in all places the captain of his soul. Corfu, July 31, 1925.

## The World's Great Capitals: The Week in Paris

Paris, Aug. 17 It is tomorrow that Marshal Petain leaves Paris for Rabat, where the generalissimo will actively undertake the direction of military operations. This seems to imply a greater extent and importance than was originally contemplated when General Naulin was appointed. He plans to make great efforts to overcome Abd-el-Krim before the rainy season.

American students will, after all, in all probability, have their pavilion on the Cité Universitaire which is being erected by the Parc Montsouris. This Cité is being erected for the purpose of providing habitations at reasonable rates for students of many countries who come to the Paris University. There are at present six main buildings. These are the French, the Canadian, the Belgian, the Argentine and the Portuguese pavilions, with an edifice reserved to former pupils of the Ecole Centrale. In addition, there are a number of countries which are negotiating for sites. Now it is proposed to build an American edifice. Permission has been given to the Americans to put up an establishment which will contain 150 pensionnaires. Unfortunately, a sum of 5,000,000 francs is required, and it is not yet known where the money will come from. It is not expected that the American Government will make any contribution, and the students are relying upon voluntary subscriptions.

+ + +

An international anecdote which has been going the rounds in Paris is too good to be lost. It concerns a Frenchman, an Englishman, a German and a Pole, who were each asked to prepare a treatise on the elephant. The Frenchman in six months produced a brilliant book, entitled, "Les Moeurs de l'Eléphant." The Englishman represented as going to the forests of India and of Africa, of securing a number of specimens and of unpre tentiously calling his book "The Elephant." The German read everything that has been written on the subject and the result of his labors came out in ten enormous volumes, "An Introduction to the Monograph of the Ele-phant." The Pole, after some investigations, published a treatise named "The Elephant and the Polish Question." Unfortunately, it is not added what kind of book was written by the American, and we must, therefore, leave it to the reader to supply his own title.

Nobody takes holidays so frankly as the Frenchman. He does not try to keep his shop open. When he decides to go away, he puts up the shutters and locks the door, placing a notice on the facade that he will be back on such and such a date. All over the town, not only in the outlying quarters, but even in the center, one will find closed stores. There is no question of leaving an assistant to run the business. It is assumed that trade will be slack and that it is just as well to take advantage of the opportunity of spending some time at the seaside or in the country. The boulevards in certain quarters have become a long row of blank shop fronts.

4 4 4 Oxford bags have introduced themselves into Paris. It is from England that men's fashions come to France, and the tailors have tried to keep up with the new mode

and have made trousers ten inches wide at the bottom and much too long. But they do not like the introduction of these English-cut clothes. Smartly dressed Frenchmen prefer tight, well-fitted clothes, and it is with some reluctance that they adopt the Oxford bags and the loosefitting coats. They do so merely because such is the decree, but they will abandon them as quickly as possible.

**+ + +** The entrance fee into the Paris museums has now been raised. A few years ago the museums were free. Then a fee of one franc was charged. So far from the number of visitors diminishing, it would appear that the mposition of a fee caused people better to appreciate the treasures which are gathered together for their pleasure. Now the authorities have decided to double the fee and, so far as one can judge, visitors have not been daunted. The Louvre, the Luxembourg, and the Cluny museums are taking a daily total of 10,000 francs. The usual average was about 5000 francs. Naturally, the majority of visitors to the national art collections are foreigners, who find the fee extremely low. Before one can make a final comparison, one must wait until after the holidays. With the augmented receipts it may be possible at least to provide a larger staff, and it that the whole of the Louvre will be open to the public every day. At present one never knows whether the portion which one wishes to see will be closed on a particular day or not.

André Gide, who has long been the leader of a French school of littérateurs, has grown tired of Paris life and has left his house, after selling many of his books, for secret retreat. He announced that he wished to be forgotten. The sight of his name in the journals had grown distasteful to him, and the constant controversies of which he was the center had prevented him from doing his best work. Unhappily, his disappearance has provoked still more talk about him. He has gone without leaving an address, but it remains to be seen how long he can stay away from the city in which he has enjoyed for many years a remarkable prestige.

The French post office issues a request that writers of letters should put their name and address on the back of the envelope before posting it. It is pointed out that a considerable proportion of letters go astray and much time is lost in opening epistles and returning them to the sender. There is, besides, the undesirability of letters being opened. It is, therefore, urged that the writers should make themselves known so that in case of nondelivery for any cause the letter can be sent back to them without delay. This is a practice which is already commonly adopted in America and in England, but which has not been hitherto generally adopted in France.

+ + + The French Minister of Fine Arts has just bought for the Luxembourg Museum another of the works of Herbert Haseltine, the American animal sculptor. The figure chosen is that of a horse, and it certainly shows great movement and vigor, especially considering that animal modeled is of the heaviest type. Recently the Government purchased a war group from the same sculptor, also for the Luxembourg Museum,
